V. G. KASHIRSKII. THERMAL PROCESSING OF OIL SHALES AND THEIR UTILIZATION IN POWER AND CHEMICAL INDUSTRY.

Published by Saratov State Technical University, Saratov, 2001.

Teaching material for students (in Russian).

Characterization of Russian oil shales. A theoretical outline of their thermal processing. Research methods of the processes of oil shale high-speed pyrolysis.

A scientific basis for construction of high-capacity units for thermal processing and combusting of high-sulfur oil shales.

Examples of utilization of oil shales as raw material for producing power, chemical stock and building materials.

Pp. 64; Figs 11; Tables 13; References 10.
